

Nexora Client Case Studies

Nexora Systems serves clients across several industries.

Case Study — Global Bank

A multinational banking organization deployed Nexora ControlHub to monitor over 300 AI agents used for customer support and fraud detection.

After deploying the platform, the organization reported:

- 32 percent reduction in hallucination incidents
- 41 percent improvement in response latency
- 18 percent reduction in operational costs

Case Study — Logistics Company

A logistics company used Nexora AgentFlow to automate shipment tracking queries. The system handled more than 1.2 million customer queries per month.

The company reported a 65 percent reduction in manual support workload.

Case Study — Healthcare Provider

A healthcare provider used Nexora's retrieval augmented generation infrastructure to provide doctors with quick access to medical research documents and treatment guidelines.

The system reduced average research time from 15 minutes to under 20 seconds.
